## PROFESSIONAL SUMMARY

---

Software Engineer with several years of experience. Expertise in TypeScript, Python, Swift, and Go, specializing in scalable web, cloud, and AI-driven applications. Proficient in Next.js, React.js, Flask, and SwiftUI, with experience building serverless architectures, microservices, and LLM-powered AI solutions. Skilled in CI/CD automation with GitHub Actions, cloud deployments on Azure and Google Cloud, and optimizing system performance. Passionate about developing high-performance, maintainable software that enhances automation, scalability, and user experience.

## SKILLS

---

**Languages:** TypeScript, JavaScript, Python, Swift, Go, Java, HTML, CSS

**Frameworks:** GitHub, Git, Node.js, Next.js, React, React Native, SwiftUI, Redux, Flask, Django, Continuous Integration/Continuous Deployment (CI/CD), Responsive Web Design

**Cloud:** Azure, Google Cloud, AWS, MongoDB, Docker, Firebase

**Software Services:** RESTful API, Microservices, Serverless Functions, Unit Testing, Object-Oriented Programming (OOP), Debugging

**Methodologies:** Agile, Waterfall

## EMPLOYMENT HISTORY

---

**Co-Founder & Chief Technology Officer | March 2025**

*Homelore | Charlotte, NC*

- Led the definition and implementation of the full technical stack, selecting Azure, Next.js, MongoDB, and Azure Functions to ensure scalability, maintainability, and seamless integration across services.
- Architected and built custom authentication solutions using MongoDB integrated with Azure Functions, ensuring robust security and efficient user management.
- Strategically guided the product vision, ensuring technology alignment with business objectives, and enabling data-driven insights for predictive home maintenance analytics.
- Designed and managed CI/CD pipelines with GitHub Actions, streamlining deployments and reducing time-to-market for new features and iterative updates.

## **Founding Software Engineer | April 2025**

*Amiqo | Charlotte, NC*

- Built and enhanced Amiqo's mobile application using React Native, ensuring seamless cross-platform performance and intuitive user experiences.
- Led ongoing application refinement, developing scalable solutions, enhancing existing features, and proactively addressing performance bottlenecks and bugs.
- Collaborated directly with product and design teams to rapidly prototype, test, and deploy new app features, significantly accelerating product iteration cycles.

## **Software Engineer | January 2024 — March 2025**

*Trane Technologies | Davidson, NC*

- Built and deployed a full-stack final inspection system with Next.js and MongoDB, delivering seamless automation and integration between sales and factories.
- Spearhead development of serverless architecture using Go and Python, integrating OpenAI capabilities while optimizing system performance through MongoDB and cloud services.
- Led the design, implementation, and engineering of modular UIs for Large Language Model (LLM) AI applications using Next.js, enhancing scalability and functionality.
- Managed GitHub repositories, implementing Git version control strategies, branching workflows, pull requests, and release management.
- Automated CI/CD pipelines using GitHub Actions streamline deployment and testing processes, reducing errors and enhancing agile methodology.

## **Freelance Full Stack Developer and iOS Developer | May 2020**

*Self Employed | Charlotte, NC*

- Automated deployment pipelines with GitHub CI/CD actions on Vercel and Azure, enabling reliable, scalable, and efficient software delivery.
- Developed modern, responsive web applications using Next.js and TypeScript, integrating RESTful APIs backend communication.
- Engineered and maintained iOS applications using SwiftUI and SwiftData, ensuring efficient local storage, synchronization, and real-time data communication.
- Designed and built interactive UI components, including image galleries and responsive forms, improving user engagement and enhancing functionality.

## **Software Engineer Intern | February 2022 — May 2022**

*Bank of America | Charlotte, NC*

- Managed service tickets for a Hadoop platform, ensuring high availability and reliability of distributed systems.
- Debugged and maintained Java based services, ensuring smooth integration with Hadoop and other frameworks.
- Created comprehensive documentation for backend processes, improving team efficiency and knowledge sharing.

## **EDUCATION**

---

**Masters of Artificial Intelligence — May 2027**

*University of Texas at Austin*

**BS, COMPUTER SCIENCE**

*University of North Carolina at Charlotte*

Concentration: AI, Robotics, and Gaming

Honors: Cum Laude

## **CERTIFICATIONS**

---

**Cloud Data Engineer**

*Google*

**Generative AI**

*Google*

**Technical Support Fundamentals**

*Google*
